Use item level to your advantage Sometimes you can win big by targeting the best item level to use for a craft. As such, you could turn into a Dark Attempt set to get a low-death version of Obliteration. You can block a number of mods and/or mod tiers from the pool by using a copy of the item that has only the correct item level. Techniques of meta-crafting Divines and some other specific orbs respect pre/suffixes cannot be altered, so you can use divines to first roll your suffixes, then craft suffixes cannot be altered to lock them in place and freely divine to re-roll your suffixes. If the item receives two affixes of the same type (suffix or prefix), it will always give the same options when revealing once. There is a wide variety of Fossils that can be found inside Delves - a randomly generated mine that you can explore between each checkpoint. Other PoE Scourge 3.16 GuidesThe information in this article applies to Path of Exile on PC, Xbox and PS4. Fossils are mainly found within the short side areas in the dark, although sometimes they even appear in the area where your cart can move. Sometimes, fossils can even spawn behind Fractured Walls, so you will have to destroy the Fractured Walls with Dynamite before you can access the fossil spawning location. Fossil farming is a very common thing to do during new leagues, simply because fossils can be quite expensive and it is a really good way to make money, but to be an efficient farmer you have to know the fossil locations and spawning rates. There are currently a total of 30 different fossils spawning at certain fossil locations also known as Fossil Biomes (within the Delve mine) and there are 7 of these fossil locations. Spreadsheet of fossil spawning locations - Mines are absent from this Spreadsheet, as well as Cent and gold from the abyssal depths. It is important to know that the TEXT of the mode that produces the block. There is something called "mod" mod For example, a quality jewelry sheet 30, with 3 white sockets, and a fancial level plane 1 added with level attack speed 1. First you use a Craicic Chimeral to create a printing of the item. In many cases the most desired are available with ILVL 1, such as +1 for the level of precious stones on armor. Using guard cards to purchase low-level high-level bases You can deliver a set of guivasing cards that rewards a specific item base (unique or not) using a low-level character . Blocking unwanted mods by modgroup before using an exalted sphere, consider creating a mod if you have an open space that increases your chances of achieving your goal. You must first create an undesirable mod that can spawn on the item, such as resistance, so that it is not part of what could roll when you use the exalted sphere or other method of adding a mod (such as exalting a conqueror). Selling an influenced amulet corrupted with any gem will clear you. You can sell any amulet influenced with a gem of each color (red, green and blue) and you will receive back a clean onyx amulet even if it is corrupted. If an item has a prefix and an open suffix, and you are regrettable enough to add only one veiled mod, it will randomly choose suffixes or prefixes to unveil. Once you have not seen the suffix and prefix us (by not adding a second mod), you will not know which are all the p options and whether the double vA o u is worth it to you. The illusion of the item will be that of the character's level. Easy way to get +1 for level of socketed gems in arches If you don't have 2 suffixes in an uninfluenced arc, you can't do the craftsmanship can't open attack mods and if you don't hit a prefix you will always be +1 for level of socketed gems. This allows scrolling of high-lvl mods over low-lvl bases. times it is better to try and p low versions of items to maximize the chances of achieving the most desired results. You cannot then use the printout that you did not make of the original item in single-mode and now you do not have 2<sup>3</sup>. This means that once you haven't seen your p for an item, they won't change, even if you don't try again. Turn in 5 corrupted rares of an item to get a clean uncorrupted (and uninfluenced) version Using the above method to get a low lvl Obliteration, you can then use a val orb on it in the hopes of bricking the unique into a rare corrupted version. A You then turn in this item and 4 other corrupted items of the same base to a vendor and get a clean uncorrupted Demon's Horn back with the added perk of being the lvl of the lowest of the items turned in. A Bypassing item lvl with beasts When using either a Farris Wolf Alpha or a Farris either remove a prefix to add a suffix or remove a suffix to add a prefix, the mods that can be added will not be limited by the item's lvl, but rather by the beast's lvl. After breaking into the safe house, use the betrayal craft bank and talk to Jun to reveal your item and reveal the new modifiers possible in your item. It is expensive, but can be used to create the most powerful items in the game.
